XRP Web3 Identity

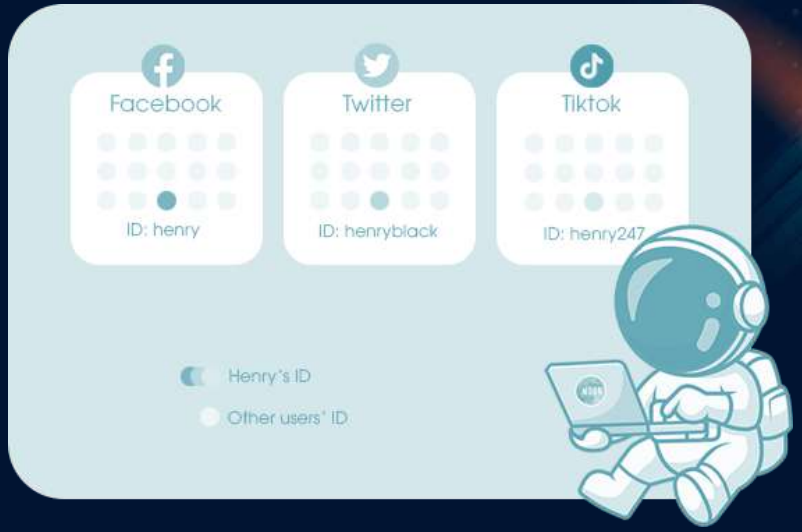
The decentralized way to build your online presence with XRP Web3 Domains

https://xrpdomains.xyz

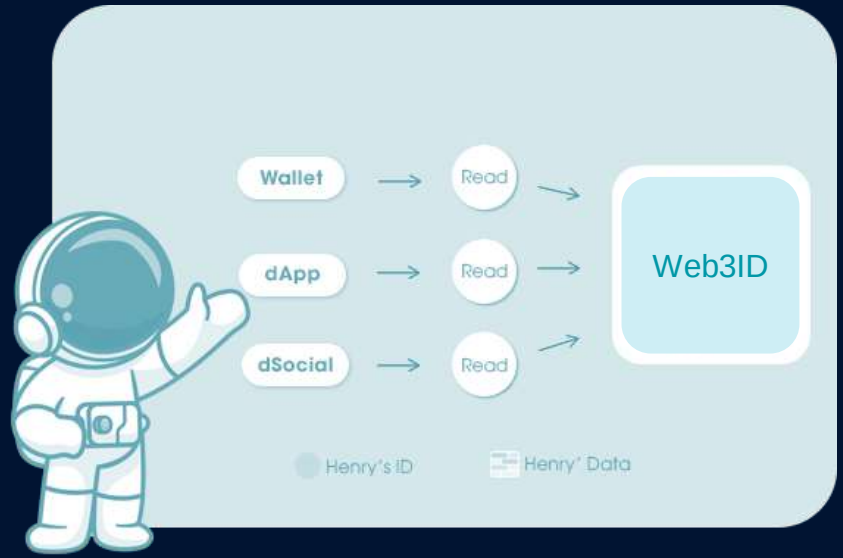
Self-sovereign

TRADITIONAL ACCOUNTS IN WEB2

In Web 2.0, application delivery, cloud services and platform are governed and operated by centralized authorities. Users use different accounts in different apps, and your data is distributed in various data containers.



Self-sovereign



WEB3 DOMAIN IS A SELF-SOVEREIGN DATA CONTAINER

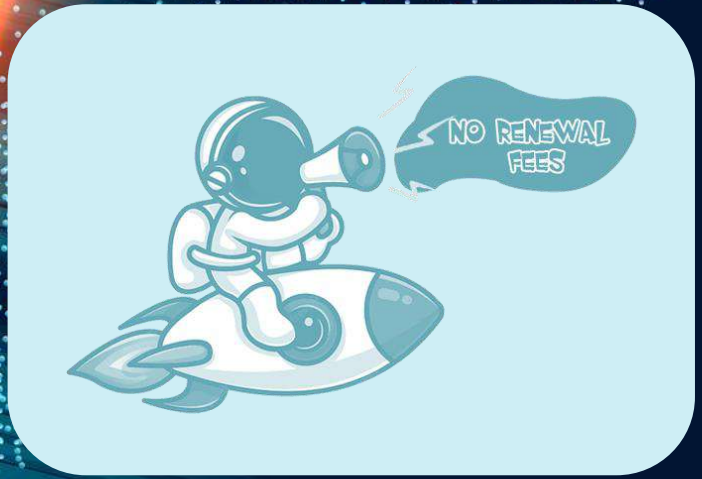
XRP domain is a decentralized data container that allows users to retain complete control and ownership over their information. It uses decentralized technologies , and allows users to access it through their XRP account in various applications.

WHOA!

REPLACE A CRYPTO ADDRESS WITH A DOMAIN NAME

WHOA!

ONE-TIME REGISTRATION FEE, NO RENEWAL FEES



XRP domains are permanent assets that are not rented. Once a domain is purchased, it remains yours forever, and no one can demand renewal fees. Similar to cryptocurrencies, XRP domains can be stored in a personal wallet, and only the owner of the domain has full control over it.

YOU OWN YOUR DOMAINS

You do not rent the domains you buy it. only one time and you own it forever with no renewal fees.

YOUR FULL CONTROL

Web3 Domain is an XLS-20 (NFT). Your domains are securely stored in your wallet and only you can manage and move them.

SDK INTEGRATION

Integrate .xrp domains into other projects to make your wallets, dapps, and apps more friendly.

SECURITY

Sending money to the .xrp domain is just as secure as sending to a regular address.
